

InkLink[®] by Seiko Instruments Inc.

Think it, Ink it, Link it!

Seiko Instruments' Ink Link Handwriting System is the ultimate tool to instantly capture your handwritten notes and drawings directly to your handheld, your laptop, or your desktop PC. InkLink is small, easy to use, and has its own carrying case that fits pocket or purse.

Using our exclusive Binaural Technology, the InkLink Data Clip continuously listens for communications from the InkLink ballpoint pen while it tracks the natural movement of your hand. The Data Clip reads the location of the pen tip and communicates your exact writing to your handheld, laptop, or desktop PC. Use any paper, any pad, any organizer system!

When you ActiveSync[®] or HotSync[®] your Pocket PC or Palm-OS PDA, your notes are accessible through the InkNote[™] Manager desktop software. Review and edit your notes, print or e-mail them.

This may be the most noteworthy enhancement ever to your handheld, laptop and desktop PC.

SMART FEATURES

- Use it anywhere you can write a note
- Organize, cut, copy, paste, e-mail and store your handwritten notes digitally
- Ideal for drawings, maps, formulas, diagrams, flowcharts, class notes
