

Smart Label Printer 240

The easiest way to print labels one-after-another.

The Smart Label Printer® is the easiest way to print labels one-at-a-time, or one after another, instantly without tying up your regular printer. Direct thermal printing technology does not require ink, ribbon or toner. The Smart Label Printer 240 prints sharp text and high quality images on labels up to 2" wide of variable length in about 3 seconds.

The printer includes Smart Label™ software with built-in database and customizable label formats. Save your favorite label formats and names in categories that you define. Our built-in database is contact-based, so it works with all your favorite software. It automatically updates contacts from label address text. You can import lists from popular contact managers and databases in a variety of formats including comma delimited (.csv). SmartCapture™ feature eliminates retyping by capturing addresses from popular word processors and contact managers.

Print labels for postage, envelopes, file folders, packages, diskettes, name badges, video cassettes and more. The SLP 240 comes ready-to-use and includes a printer, Smart Label software, printer cable, power supply and a box of labels.

SMART FEATURES

- Put an end to messy ribbons, inks and toner thanks to Seiko Instruments' direct thermal printing technology
- Be more productive printing labels in about 3 seconds
- Print labels of variable length and continuous-feed paper

Smart Label Software Features

- Mix multiple fonts on a line; add logos, graphics and bar codes for professional labels
- Rotate text and graphics
- Create label format templates and apply instantly with Smart Label icons
- Categorize labels in the built-in database for easy recall
- Import and export label lists in various file formats including comma delimited (.csv)
- "SmartCapture" addresses directly from popular word processors and contact managers.
- Print Postal bar codes (US, UK and The Netherlands) automatically for quick, accurate mail delivery - at potentially lower cost
- Print Code 39, UPC A, EAN 13, 1 2/5, Code 128 and USS Codabar bar codes - control height and density for more effective bar coding
- Easily add serial numbers with our counter feature
- Print directly from other applications with included printer drivers
- Save time by printing in the background as you work

SmartLabel Types

Many different label types and sizes are available. Visit your local reseller and look for the SmartLabels logo.
