

SmartPad2™ by Seiko Instruments Inc.

From Hand to Handheld

Imagine writing anything. In any language. Drawing whatever you like. Writing on paper. And capturing everything on your handheld organizer. The Seiko Instruments SmartPad2 is the first product to allow you to capture anything written or drawn on your handheld, with the natural feel of pen on paper.

SmartPad2 is a stylish, zippered notepad portfolio, which captures handwritten notes and drawings, instantly sending them to your Palm-OS based handheld Organizer via the infrared port. Using the enhanced SmartPad2 Palm applications, save notes, drawings, and maps in any of the four main Palm applications. Using an optional modem and email client software, you can email your notes directly from your PDA. The SmartPad2 is compatible with all Palm, Handspring, Sony, HandEra and IBM handhelds through the adjustable infrared transmitter. The Smart Keypad is a “tap-type” keypad that uses the SmartPad pen to enter letters and numbers directly into the four main Palm applications.

When you HotSync® your handheld, your notes are accessible through the SmartPad2 desktop software. Review your notes, print or e-mail them.

This may be the most noteworthy enhancement ever to your handheld.
