

## Version 6.3.0.337 Software (Windows):

### SmartLabel v 6.3.0.337 Application and Driver

Version: 6.2.0.337

#### A Few Notes Before Installation:

- A dramatic improvement in the functionality of the SmartCopy feature that coexists with popular Windows Programs. An icon of the SmartCopy logo is installed on to the application's toolbars for faster importing to labels.
- This version has been tested fully on Windows Vista 32-bit and found to be a stable and fully operational. We are currently on development for operating system using 64-bit technology.
- For USPS postal barcodes, you now have the option to print barcodes only using the 5 digit zip codes

#### Supported Models:

- SLP 100, 200, 240, 410, 420, 430, 440 and 450

#### Supported Operating Systems:

- Windows 2000 (Service Pack 4) , XP (Service Packs 1 & 2)

#### Who should upgrade?

- Users that are currently using version 4.x application software and are using Windows 2000 or XP operating systems.
- Users who need certified Microsoft Drivers.
- Users using who want to use "mode" and "security" settings for 2D bar-coding.
- Users who want to utilize our new label templates.
- User who were having difficulty importing .txt and .csv files.

#### What's New?

- New Driver
  - Signed by Microsoft, no more security warnings when installing!
  - Improved "Windows Update Friendly" driver.
  - New label sizes.
- New Installer
- Software Updates:
  - Smart Label Application:
    - New label sizes and layouts.
    - New Default Labels.sll file.
    - New label sizes added and localized.
    - Added "Mode" and "Security" settings for 2D barcodes.
    - improved .txt and .csv import and export
  - Detailed Changes:
    - Changed version to 6.3.0.337.
    - Improved network printer detection mechanism.
    - Added Mode and Security controls to Advanced Bar Code dialog.
    - Fixed hidden Unicode printing

- Updated bar code width calculations.
- Improved detection of network printers.
- More reliable .csv import.
- Added security mode settings for 2D barcodes.
- Fixed code to allow SLP-100 and SLP-200 printers to be installed.
- Fixed issue with not detecting older firmware in older SLP 100, 200s.

### Installation Notes:

- The USPS now requires zip +4 to expedite mail at the processing centers. We have given the option to still print the PostNET barcode using only the 5 digit zip code.
- If you receive a slpwin.exe error when installing version 6.0 software, you will need to delete slplib.sll file found in the Windows folder of the "C" driver. Follow this path to delete this file: C:\Windows\slplib.dll
- All new users of the Smart Label Printer software should get the Jewelry Tag template by default. However, users who had software version 4.x installed will not. (Our installer won't overwrite all of your saved labels!)

1. Run the Smart Label Printer software.
2. From the "Label" menu, select the item "Library->Select...".
3. A file selection dialog will appear that displays the name of your current label library. Make a note of this name.
4. Select "Default Labels.sll" and click "Open".
5. Push the "\*" Button, select "Jewelry Tags", push "OK".
6. Again, go to the "Label" menu, select the item "Library->Select...".
7. Select the file you noted in step 3, and push "Open".
8. From the "Format" menu select "Save format...".
9. Choose a name for your "Jewelry Tag" format an icon. You can also assign the template to a button in the toolbar at the left side of the screen.

- After installation of your software you only see a few label templates, you will need to go to printer set-up to install the SLP 450 driver. To do this, follow these steps:

From your SLP version 6.x software:

1. Select "Label" ⇒ "Printer Setup"
2. From "Printer Setup" screen Select "Add Printer"
3. From the "Smart Label Printer Setup" screen select the connection type, when the connection screen appears turn you printer on and click "OK"
4. The "Smart Label Printer Setup" screen should reappear and in the bottom of the window the "Status" bar should have the printer information in it.
5. Click the "Done" button, your templates should now be installed.

- For additional questions regarding installation of use of this software, please refer to our Frequently Asked questions (FAQ's) located in the Support section of our website found at: <http://www.siibusinessproducts.com/support/400faqs.html>.
- Please feel free to leave any issues, comments, and/or questions on our Software Feedback Form located on our website - <http://www.siibusinessproducts.com/sdk/feedback.html>. Your feedback is greatly appreciated. Any information received would provide useful awareness with issues that have surfaced and with future improvements in our software.
